After graduation from the school, during more than 5 years, my wife and I have been running a small farm in our hometown, which can produce many kinds of food, such as tomatoes, potato, green vegetables, soybean and so on, and also raise some animals, such as pig, cow, chicken. But unfortunately we could not continue to run our farm for Covid-19 and flood. We are willing to apply the latest agricultural technology to the farm, and we have been always having a dream about building a modern farm of us in the future. We want to try seek all kinds of challenge in challenging areas, and We believe your job will be my next unique opportunity.
